Information about PCS Next Generation

In general:

PCS NG will improve quality of the process, allow faster working and thus lead to a higher result of dossiers harmonised respecting the deadlines

PCS legacy version

- Static user interface based on 2004 technology
- Change requests have been implemented, but the front end, (user side) has never been redesigned
- PCS does not support multi usage windows
- Fixed views, no user flexibility
- Difficult to keep overview of all tasks

PCS NG:

- Dynamic user interface ,supports all modern browsers
- Complete redesigned user interface, taking in account the feedback of the users during the development of the new platform
- Supports multi tasking (working in different screens)
- Dynamic views, user freedom to create views, and share with other users
- Easy to do list, automatic task list, and possibility to create own task filters
